At Google, we have a vision of empowerment and equitable opportunity for all Aboriginal and Torres Strait Islander peoples and commit to building reconciliation through Google's technology, platforms and people and we welcome Indigenous applicants. Please see our Reconciliation Action Plan for more information.

Minimum qualifications:

- To meet federal government security criteria Australian Citizenship is an essential requirement for this role
- Successful candidates will be required to obtain NV1 clearance under the Australian Government Protective Security Policy Framework
- 7 years of experience managing distributed technical teams as a team lead or manager

- 3 years of experience in data center leadership

Preferred qualifications:

- Experience working in data center environments, including building and operating large-scale infrastructure, network and compute architecture and lifecycle, and Linux/Unix system administration
- Experience with initiating and executing strategic initiatives in a global environment
- Experience managing and developing managers
- Ability to travel as needed
- Excellent problem solving skills
- Demonstrated passion for operations and people management

About the job

As a Data Center Operations Manager, you will manage a team of Data Center Technicians. You will oversee the quality installation of server hardware and components and take the lead on complicated installations/troubleshooting. The team will install, configure, test, troubleshoot, and maintain hardware (e.g., servers and its components) and server software.

Behind everything our users see online is the architecture built by the Technical Infrastructure team to keep it running. From developing and maintaining our data centers to building the next generation of Google platforms, we make Google's product portfolio possible. We're proud to be our engineers' engineers and love voiding warranties by taking things apart so we can rebuild them. We keep our networks up and running, ensuring our users have the best and fastest experience possible.

Responsibilities

- Oversee the day-to-day management of teams within data center operations.
- Work with others to identify problems and create solutions for computing and network architecture.
- Own the management and implementation of multiple projects for the team.
- Hire, mentor, and develop a team of technical staff to meet objectives.
- Implement and drive the safety culture at the sites, while fostering an inclusive, diverse, and collaborative team environment.

Google is proud to be an equal opportunity workplace and is an affirmative action employer. We are committed to equal employment opportunity regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, gender identity or Veteran status. We also consider qualified applicants regardless of criminal histories, consistent with legal requirements. See also Google's EEO Policy and EEO is the Law. If you have a disability or special need that requires accommodation, please let us know by completing our Accommodations for Applicants form.

To all recruitment agencies: Google does not accept agency resumes. Please do not forward resumes to our jobs alias, Google employees or any other organization location. Google is not responsible for any fees related to unsolicited resumes.
